

1986 JORDAN LAKE SNAPSHOT

A volunteer trained by the Wisconsin Department of Natural Resources started taking regular readings of water clarity in Jordan Lake in 1986.

The average summer water clarity in 1986 was 8.4 feet, which is very good water clarity.

1987 and 1988 JORDAN LAKE SNAPSHOT

Water clarity monitoring continued in 1987 and 1988.

The average summer water clarity in 1987 was 9.6 feet (very good).

The average summer water clarity in 1988 was 10.7 feet (very good).
