

## ***Proposal to Commissioners of JLRPD***

### ***August 2025 (repeat of 2024)***

Our recommendation of a financial investment is based on discussions with surrounding fishery committees as well on the preliminary spring 2024 fish study reported by DNR (Ms. Bergman-6/24). Originally, we had planned to recommend fish stocking by DNR and private funding. We have modified our recommendation to the following:

- This is the second year so that we may achieve the budgetary amount for initial projects....
- Survey and determine local businesses and request amounts to support this lake enhancement-Fall/Winter 2024
- Request a yearly budgetary item of \$1,500-\$2,000 for fishery improvement.....an initial habitat project-Fall/winter 2025
- Work with DNR to request a proposal and facilitate a habitat project
- Develop plan and timeline for yearly habitat and/or fishery enhancement projects
