

## **LAKE FACTS AS OF JUNE 1, 2024 by Mike Backus**

### **ICE Review**

The lake had full ice on January 15, 2024, and no ice on March 6, 2024. Both dates were only days away from being records dating back to 1970.

### **Lake Plant Ecology**

On Saturday, June 8<sup>th</sup>, Keifer Sroka, the Adams Co Lakes Specialist, will hold a free session on this topic. The session at the Wolf Lake Boat Landing from 10am until noon will include hands on Aquatic Plant identification and he will share the function of plants in a lake. Lite lunch will be provided BUT registration is needed. 608-339-4269

### **Wisconsin Landing Blitz**

Again this year, the DNR encourages all CB/CW monitors to emphasize the importance of CB/CW practices during a landing blitz held June 26—July 6<sup>th</sup>. A small token gift will be provided to boaters contacted by monitors during those days.

### **Lake Clarity**

Keifer Sroka took it upon himself, days after the ice left our lake, to do a Clarity reading. He documented that he got a reading of 35' (a record for us) only because the device could not go deeper! Our summer average is about 15-18'.

### **Rain**

Since April 6<sup>th</sup>, the lake area has received 9.81" of rain. Moisture we did not get from snow we are getting from Spring rains.

## **Lake Water Level**

Measurement of our lake water level started on May 19<sup>th</sup>. The Spring rains have increased our lake level by 5" as of this date.
