

Lake Update 03/18/2016

Submitted by Mike Backus

ICE ON/ICE OFF

By DNR definition, Ice On means full ice shore to shore with no openings and Ice Off means no ice anywhere short to shore.

Ice On this past season was on 12/18/2016 (after a few “false starts”). Ice Off is pending.

A spreadsheet of Ice On/Ice Off history is being developed.

Central Sands Monitoring

The level is up 9” since the lowest reading in 2016.

Shoreline measurements are different due to the water’s ability to seep into other areas.

Lake Convention

Scheduled for April 5-7 in Stevens Point.

The District is deciding who will attend.

Jordan Lake July 4th Landing Blitz

Jordan Lake District has registered for handouts.

Clean Boats/Clean Waters

No coordinator has come forward.

Ideal would be one person from each side of lake to be able to find volunteers from their area.

Reesa Evans

Her position at Adams County is funded for 2017.

Parker Lake

Added 12 large fish cribs.

More fish cribs position east of Rest Area.

High Capacity Wells

New rule changes proposal.

Mostly helps farmers not lakes/streams.

Senate Bill 76 and Assembly Bill 105 are all pro-agriculture.
